ABOUT

Solution and results-driven Developer. Played a key role in developing a Point of Sale (POS) platform, where I led the design and implementation of a complete architecture using React, Next.js, TypeScript, Prisma, and Shadcn/UI. Managed the entire development cycle, achieving measurable impacts: +40% usability through intuitive interfaces, +35% operational efficiency by optimizing workflows, and +50% performance via full-stack optimizations. Driven to create effective technical solutions that combine clean code, solid architecture, and exceptional user experience.

EXPERIENCE

Web Developer (Intership)
April 2021
Porto, Portugal
July 2021

MULTI-DI - Conquistagadget, Lda., Vila Nova De Gaia

- Management and control of company website content
- Website code optimization
